

POINT LEVEL SENSORS

Drum Level Indicators

LV-110 Series
Starts at

\$304

**Compatible with Most
Liquids and Chemicals**

**Models Rated to
Maximum
750 psi**

**Drum Level Indicators
Require No Electricity**

The LV-110 Series drum level indicators are compact, self-contained liquid-level indicators designed for use in 55-gallon drums. A magnet-equipped float senses level, and the user can obtain a readout by removing the protective cap and reading the indicator measuring tape. LV-110 units can be used in either horizontal or vertical drums.

Temperature Range:

316 SS: 0 to 300°F

Brass/Buna-N:

0.6 to 82°C (33 to 180°F) in water,
-17 to 110°C (0 to 230°F) in oil

Pressure Rating: 750 psi for 316 SS
float; 150 psi for Buna-N floats

Mounting: 2 NPT

Tube/Fitting Size: ½" OD tube

Mounting Attitude: Vertical ±30°

Vertical Mount Typical

LV-113, \$734,
shown smaller
than actual size.
